

Housebreaking Schedule

It is very important that all dogs and puppies are kept on a consistent schedule. This includes play/family time, potty time, training time and nap time. The following time blocks will get your pup on a solid schedule. The spaces between the blocks are crate time, **even if you are at home**. Remember to monitor food and water, never give your puppy total freedom and clean up mistakes very well. If they keep hitting the same place inside, feed them there. Consistency is key (same potty word, times and location).
